

## SAFETY PRODUCTS

### NECK SHADES & SHIELDS

#### Concept

A simple & effective way to guard against the sun's UV rays. Our lightweight, high visibility neckshade easily attaches to any hardhat offering protection for the neck, shoulders and side of the face. Waterproof & FR/Arc Flash materials also offer protection against liquids, chemicals, sparks, molten metals, etc..

#### Market

As a shade, it can be used for any outdoor work where exposure to harmful ultra violet radiation is prevalent. As a shield, it also offers protection for miners, forest fire fighters, welders, foundry workers, linesmen, food processors, petro-chemical workers, etc...

#### Features & Benefits

- Constant protection from UV rays
- High visibility colours
- Reflective strips for low-light environments
- Fast & Easy attachment to any hardhat
- Custom printing of company names & logos

### VISOR SEALERS

#### Concept

A specially designed fabric attaches to the hardhat and visor system sealing the gap between the visor and hardhat brim. This prevents dust, debris and liquids from falling into the worker's face!

#### Market

Applications include cutting, grinding, pouring, spraying, etc... common in environments such as construction, mining, petrochemical, forestry, food processing foundries, metal fabricating and many others.

#### Features & Benefits

- Fits most hard hats and visors
- Easy to apply hook-loop system (hard hat friendly)
- Various fabrics for dust, liquids, chemicals, molten metal
- Lightweight - does not interfere with visor function
- Compatible with most headband earmuff/visor systems as well
- Custom printing of company names & logos

## BUG SHADES

### Concept

A Neckshade that can attach to a ball cap or hardhat for UV protection AND repel flying insects with a strip of cotton soaked in DEET.

### Market

For anyone outside with the bugs who wants to keep them out of their face! Since DEET is a "repellent" this is especially good for anyone not wanting to apply DEET directly to their skin but still benefit from its effectiveness.

### Features & Benefits

- White colour is best to repel bugs and reflect the sun's heat
- Special high-absorption cotton strip that will effectively soak up DEET and slowly release it all day
- Easy to attach to any ball cap or hard hat with self-adhesive hook & loop system
- Cotton strip enables DEET to protect you from insects without having to risk absorption of the chemicals through your skin

## BUG HOOD

### Concept

A high quality Bug Hood conceived, designed and made specifically for those who work outdoors and require effective protection from biting insects.

### Market

Anywhere in Bug Country - from northern Labrador to southern Florida. The Bug Hood is intended for those who need a practical solution from biting insects but can't afford to compromise their ability to carry out their responsibilities.

### Features & Benefits

- Unique "Bubble Shape" designed to fit over a hard hat
- Bug-tight elastic seal around shoulders
- Extra-fine FR No See-Um mesh keeps out even the smallest insects
- Ultra-lightweight and completely porous allows air to easily flow through
- Material easy to see through
- White back reflects heat while black front allows enhanced visibility

## REFLECTIVE BRACES & BELTS

### Concept

Our quality braces and belts offer a practical and effective means of high visibility in any low light environment. They can function on their own or attached as a system.

### Market

You don't always want or need full high visibility reflective clothing. This system is easy to put on and take off and adjusts to your situation; whether you're wearing a speedo or an arctic parka.

### Features & Benefits

- Hi-Vis fluorescent orange and yellow-green 2" elastic
- 1" 3M High Intensity reflective silver tape
- Adjustable to fit everyone (dressed for any condition)
- Suspenders and Belts can be worn separately or together
- Heavy-duty steel clips on Suspenders won't break or slip
- Belts have unique Break-Away safety feature
- Arm Bands offer one-hand adjustment to ensure snug fit regardless of clothing

## ORBIS REFLECTIVE BANDS

### Concept

A "stretchy" reflective band that "sticks" to any hardhat or helmet by friction alone. Intense reflection provides night-time and low-light visibility as well as identification with custom printing. Our adjustable model can also be used as an armband, legband, headband etc...

### Market

Virtually anyone (with or without a hardhat or helmet) who wants to be seen or identified. Whether you're inside, or outside, on the road, in the bush or underground, an additional level of visibility will always help to prevent accidents.

### Features & Benefits

- Band width 38 mm (1.5")
- Highly Reflective 25 mm (1") 3M Tape
- Fits any hardhat or helmet
- Quick and easy to put on
- Can be easily removed or exchanged
- Stays in position until removed
- No adhesive required
- Custom printing available
